As a proud owner of the new console, and as the lead program manager for Xbox One, I get a lot of questions about the power of the new system. On top of that, I get questions about the price of the console, the durability of the console, and even more questions about the new Kinect sensor. I just want to take a moment to talk about some of the great features of the new console. I'm not just talking about the new controller and mouse. I'm talking about the power of the new console, the features that are in your control right now, and the new options that are coming to Windows 10. Xbox One: The power of Xbox One is twice as powerful as the current generation of Xbox. With more processing power, a larger memory, faster memory, and faster disk access, Xbox One is designed for gamers, with features tailored for hardcore and casual gamers alike. The console does this by offering a combination of exclusive features, improved performance, and new features like Skype in Windows 10. Surprise: Your console now has more power than even the current generation of consoles did. The Xbox One has twice the number of CPU cores than the Xbox 360
